**TABLE 26-1. FEDERAL BUDGET BY AGENCY AND ACCOUNT, FY2023 PRESIDENT'S BUDGET POLICY**

**EXPLANATORY NOTE**

This section includes a detailed tabulation containing information on budget authority (BA), and outlays (O) for each appropriation and fund account, and summaries of offsetting receipts.

Budget authority is the authority provided by law to incur financial obligations that will result in outlays. The specific forms of budget authority are appropriations, borrowing authority, contract authority, and spending authority from offsetting collections. The amounts include the effects of transfers of budget authority between appropriation accounts.

Outlays are payments to liquidate an obligation (other than the repayment of debt principal or other disbursements that are "means of financing" transactions). Outlays include payments to liquidate obligations of budget authority provided in previous years and in the current fiscal year.

Offsetting receipts are collections that are offset against BA and outlays instead of being shown as revenue. The two main types are intrabudgetary receipts, which offset payments from other budget accounts so that these intrabudgetary transactions have no net impact on BA and outlays, and business-type receipts, which are offset against the cost of those activities so that BA and outlays show the net financial impact of those activities on taxpayers.

Congressional action on appropriations occasionally results in the establishment of a limitation on the use of budgetary resources that would otherwise be available for obligation. Amounts for limitations are included here in italics, but are not included in the totals for budget authority and outlays.
